Aids

Grab bars and supports

Ponte Giulio means “safety” for bathrooms; this concept finds its most immediate expression in grab bars, in folding supports, in any “aid” that assists those who, for different reasons, find it difficult to use the bathroom in daily life due to limited balance or movements.

PAINT

Essential and inexpensive without sacrificing safety and quality: these are the essential characteristics for those who want to have useful accessories to make the use of the bathroom safe. The "paint" line meets these requirements; the aids, designed with classic shapes, are made of steel tubes with external powder finish; a polyamide flange cover protects the flange and hides the fixing screws.

FLANGE SYSTEM

The corner grab bars and supports (or for corners) feature a flange "system" with a round shape - ø 82 mm - based on a polyamide flange for wall mounting - reinforced with fibreglass - and a polyamide-6 flange cover that protects the flange and hides the screws.

PLATE SYSTEM

The folding supports of the "paint" line are offered with the "plate system" in two versions: a "compact" version and an "extended" version; the "compact" version occupies an area of 82 cm² on the wall, it features an AISI304 stainless steel plate for wall mounting - which also acts as a joint for the grab bar body - equipped with a counter-plate and a polyamide-6 plate cover that hides the fixing screws. The "extended" version features an AISI304 stainless steel plate - which also acts as a joint for the grab bar body - equipped with a counter-plate to reduce the risk of damage to the wall. The surface area is 219 cm², in order to allow the support to rest on the plate itself.

THE SURFACE FINISH OF THE GRAB BARS

The supports and grab bars of the "Paint" line are offered with two different powder finishes: a traditional one and one with "Rilsan®". The latter is a polyamide of vegetable origin, with excellent hardness, anti-corrosion and electrical insulation properties. This type of finish, unlike other similar ones, does not absorb water, ensuring excellent resistance to the aggression of grease, oil, saline solutions and solvents.

The Fixed lateral safety grab bar - G06JCS05 / G06JCS07 - is usually placed next to a washbasin to offer immediate support for people who, for various reasons, need a reliable aid that is always at hand.

The item is reversible, i.e. The reinforcement arm can be installed on the right or on the left of the support itself, during installation.

TUBOCOLOR

TUBOCOLOR® grab bars are made of a seamless galvanised steel tube, coated with **non-slip, biocompatible and antibacterial vinyl**. They can be fastened to any type of wall by means of a glass reinforced polyamide flange, with 4 holes to insert the screws, and a flange cover with a diameter of 80 mm. TUBOCOLOR® are delivered disassembled and ready to be assembled by the installer.

FLANGE SYSTEM

The corner grab bars and supports (or for corners) feature a flange "system" with a round shape - ø 81 mm - based on a polyamide flange for wall mounting - reinforced with fibreglass - and a polyamide-6 flange cover that protects the flange and hides the screws.

PLATE SYSTEM

The folding supports of the "tubocolor" line are offered with the "plate system" in two versions: a "compact" version and an "extended" version; they both feature an AISI304 stainless steel plate for wall mounting - which also acts as a joint for the grab bar body - equipped with a counter-plate to reduce the risk of damage to the wall, and a polyamide-6 plate cover.

The difference between the two concerns the surface area occupied on the wall, which is equal to 107 cm² for the compact version and 262 cm² for the extended version; the size of the latter allows for the support to rest on the plate itself.

ANTIBACTERIAL PROTECTION

Both the supports and the grab bars of the "Tubocolor" line guarantee protection against bacteria and fungi, preventing their proliferation, thanks to the use of "Biocote" technology which creates a surface on which microbes cannot proliferate; active 24 hours a day for the expected lifetime of the product.

Y96SES56

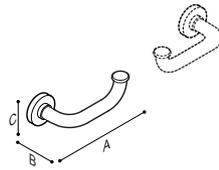

The grab bar with one straight end and one 90° end is particularly useful in cases in which a fixture is installed near a corner of the room, where there is not enough space to install other items with the same function.

This product optimises installation and provides a valid aid to assist movements.

TUBOCOLOR_ PAIR OF SAFETY GRAB BARS FOR WASHBASIN

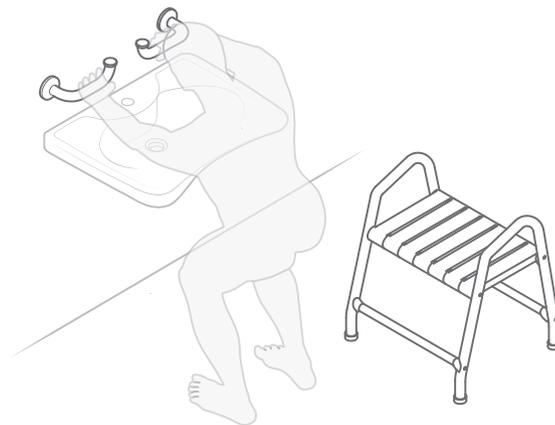

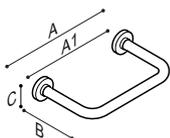

Material	Antibacterial vinyl, Antibacterial polyamide, Galvanised steel										
Colours / Finishes	B1	B2	D1	D2	D4	G1	G2	I1	I2	P4	R1

URBAN PEOPLE

All items of the "Urban People" line are made of galvanised steel tube, coated with **non-slip, biocompatible, self-extinguishing vinyl**, with silver ions and therefore with an antibacterial effect.

The items are delivered assembled. The items of the Urban People line can be attached to any type of wall and they feature a stainless steel flange with 6 holes to insert the three dowel and the stainless steel screws supplied, a wall levelling gasket and a flange cover with a diameter of 71 mm.

FLANGE SYSTEM

The corner grab bars and supports (or for corners) feature a flange "system" with a round shape - \varnothing 71 mm - based on an AISI304 stainless steel flange for wall-mounting, a polyamide-6 counter-flange and a polyamide-6 flange cover for protection and to hide the screws.

Alternatively, two flange systems are offered: a round one - \varnothing 81 mm, and a square shaped one with rounded corners - 80x80 mm.

PLATE SYSTEM

The folding supports of the "Urban people" line are offered with the "plate system" in two versions: a "compact" version and an "extended" version; they both feature an AISI304 stainless steel plate for wall mounting - which also acts as a joint for the grab bar body - equipped with a counter-plate to reduce the risk of damage to the wall, and a polyamide-6 plate cover.

The difference between the two concerns the surface area occupied on the wall, which is equal to 143 cm² for the compact version and 231 cm² for the extended version; the size of the latter allows for the support to rest on the plate itself.

ANTIBACTERIAL PROTECTION

Both the supports and the grab bars of the "Urban people" line guarantee protection against bacteria and fungi, preventing their proliferation, thanks to the use of "Biocote" technology which creates a surface on which microbes cannot proliferate; active 24 hours a day for the expected lifetime of the product.

URBAN PEOPLE FOLDING AND ROTATING SAFETY GRAB BAR WITH REINFORCEMENT JOINT AND VERTICAL LOCKING

In accordance with standard UNI EN 12182

Material	Antibacterial vinyl, Antibacterial polyamide, Galvanised steel, Stainless steel										
Colours / Finishes	B1	B2	D1	D2	D4	G1	G2	I1	I2	P4	R1
	R7	W1	Y1	Y3							

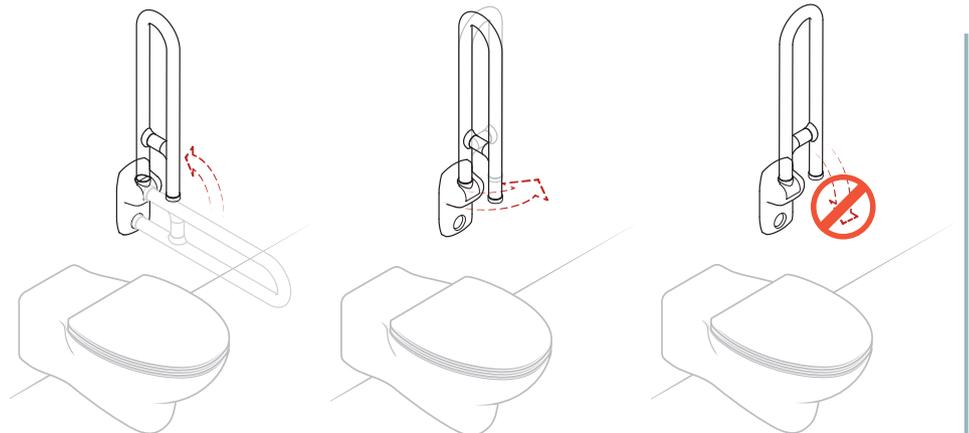

Code	AxBxC [mm]	Weight no.[kg]	Load [kg]	€ x 1pc.	€ x 3 pcs.
G27JCS85xx	112x850x207	4.20	100		

A 07
p.393

The folding grab bars - G27JCS65/70/85 - feature a locking system that prevent the arm from lowering if, once lifted, it is also rotated towards the wall, to the right or to the left. This movement also reduces the overall dimensions of the item.

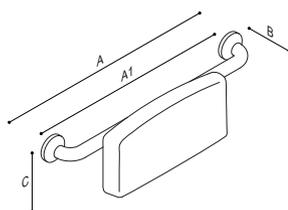

Please note
The product is supplied in its standard version with the locking function that acts when the grab bar is rotated to the right. On request, this direction can be inverted.

URBAN PEOPLE BACKREST

The polyurethane backrest is only available in black

Material Antibacterial vinyl, Antibacterial polyamide, Galvanised steel, Stainless steel

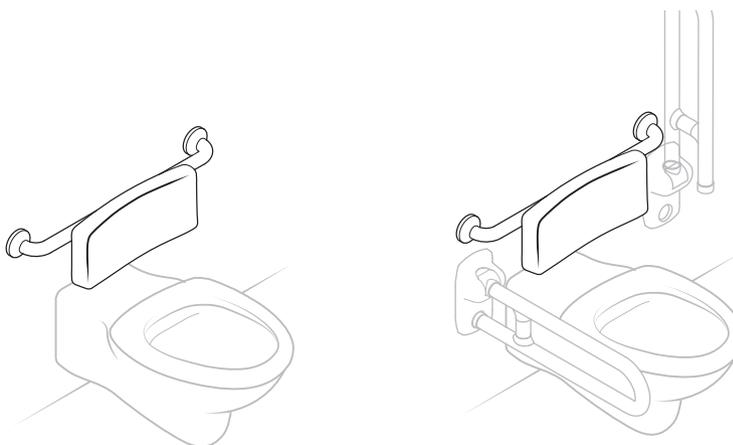

Colours / Finishes

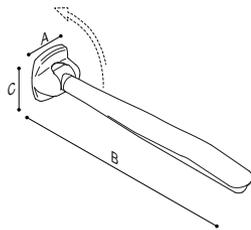

B1	B2	D1	D2	D4	G1	G2	I1	I2	P4	R1
R7	W1	Y1	Y3							

Code	AxBxC [mm]	A1 [mm]	Weight no.[kg]	Load [kg]	€ x 1pc.	€ x 3 pcs.
G27JDS29xx	700x156x225	628	3.80			

The backrest - G27JDS29 - is suitable for use with elongated toilets without a seat. The depth of the backrest frame and the distance between the two wall anchors, allow for it to be installed without interfering with wall built-in tanks - such as Geberit®. The backrest, if combined with folding grab bars, offer a complete safety solution for the toilet.

URBAN PEOPLE SHORT, FOLDING SAFETY ARMREST

The armrest is available in white only. Only the plate-cover can be coloured.

G27JAS14xx	187x187x847	775	2.30	150		

The grab bar for installation on "edge" - G27JAS14 - proves to be a brilliant solution for all contexts in which, between one area and the other of the bathroom, there is a corner.

The advantage offered by the vertical installation position, the possibility of being inserted in any context, without being particularly bulky, are its main features.

URBAN PEOPLE_ROUND SAFETY GRAB BAR

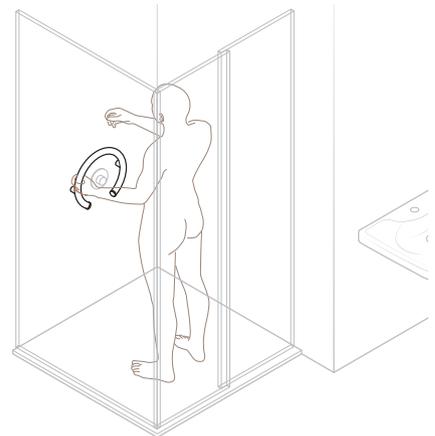

Material	Antibacterial vinyl, Antibacterial polyamide, Galvanised steel, Stainless steel										
Colours / Finishes	B1	B2	D1	D2	D4	G1	G2	I1	I2	P4	R1

STAINLESS STEEL WITH SATIN FINISH

The stainless steel with satin finish make the products in this line particularly suitable for use in public areas with high traffic. Every detail is made exclusively of AISI304 stainless steel, in order to guarantee durability, reduced maintenance interventions and practical cleaning operations.

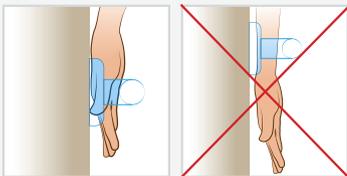

FLANGE SYSTEM

The straight, corner and L-shape grab bars feature a round shape wall-fixing flange - \varnothing 78 mm - in stainless steel AISI304 and a flange cover to hide the fixing screws in the same material.

PLATE SYSTEM

The folding grab bars are offered with a plate for wall mounting, on which the grab bar body is fixed. The surface area occupied on the wall is equal to 178 cm², allowing for the bar to rest on the plate itself when folded down.

SAFETY DISTANCE FROM THE WALL

"American with Disabilities Act" establishes that a support grab bar must be 38 millimetres away from the wall. This prevents the hand from slipping between the wall and the bar itself, avoiding potential fractures to the wrist in the event of a fall.

POLISHED STAINLESS STEEL

The union of an indestructible material with a "classic" shape is the principle behind the products of this line, offered in polished stainless steel. This solution offers the double advantage of ensuring a long life and making cleaning operations easier. The offer is particularly suitable for private domestic use, although the choice of using stainless steel also makes it suitable for use in public areas with high traffic.

FLANGE SYSTEM

The straight, corner and L-shape grab bars feature a round shape wall-fixing flange - \varnothing 81 mm - in stainless steel AISI304 and a flange cover to hide the fixing screws in the same material.

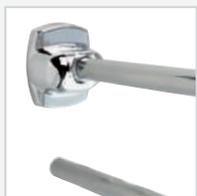

PLATE SYSTEM

The folding supports of the "polished stainless steel" line are offered with the "plate system" in two versions: a "compact" and an "extended" one. The "compact" version; the "compact" version occupies an area of 143 cm² on the wall, it features an AISI304 stainless steel plate for wall mounting - which also acts as a joint for the grab bar body - equipped with a counter-plate and a polyamide-6 plate cover that hides the fixing screws.

The "extended" version features an AISI304 stainless steel plate - which also acts as a joint for the grab bar body - equipped with a counter-plate to reduce the risk of damage to the wall. The surface area is 219 cm², in order to allow the support to rest on the plate itself.

PRESTIGIO

The "Prestigio" line consists of straight grab bars featuring ends built into the flange system with chrome finish. The body of these bars, made of AISI304 stainless steel, guarantees a safe support for anyone using them; they are available with a polished finish or with epoxy powder treatment. "Prestigio" aids are primarily designed for use in private environments.

FLANGE SYSTEM

The grab bars feature a built-in flange "system", made of ABS, which joins the end of the grab bar to the flange itself. The flange has a diameter of 80 mm and features a cap to hide the heads of the fixing screws.

SAFETY DISTANCE FROM THE WALL

"American with Disabilities Act" establishes that a support grab bar must be 38 millimetres away from the wall. This prevents the hand from slipping between the wall and the bar itself, avoiding potential fractures to the wrist in the event of a fall.

Seats

Shower seat , stools and benches

When we talk about “safety” for the bathroom, it is rare to consider that the most useful and essential element for this purpose is a seat. Anyone, regardless of their age, sex or ability, can easily and safely perform daily actions, such as washing their face, having a shower or preparing for a bath, while seated.

Ponte Giulio offers a wide range of seats, stools and benches designed to meet the different needs of different contexts, near the washbasin, near the shower or near the bathtub, with the aim of making each environment safe and comfortable.

SANITARYWARE

Toilets, bidets, washbasins, tanks and sanitary modules

The toilet, the bidet and the washbasin represent the discriminating elements of any bathroom. We could prefer a classic style, rather than a minimal one, have a console sink instead of a washbasin or choose to install a urinal instead of a toilet, but without these items the bathroom would not exist.

The bathroom fixtures offered by Ponte Giulio have special features such as floor-mounted toilets and bidets with a height of 500 millimetres, washbasins with elbow rests and with a suitable depth to leave room for the knees. All of this in classic and modern styles, to allow for them to be integrated in private or public bathrooms.

Shower

Shower trays, enclosures and accessories

Depending on the context in which it is installed, the shower must meet specific requirements; in a professional environment, such as in hotels, the aspects that need to be considered are practicality, maintenance costs and functionality. In the context of assistance and care, in places like nursing homes or hospitals, the shower area must have other characteristics. Here at Ponte Giulio we are aware of all of this, therefore we have selected fibreglass, porcelain and acrylic stone shower bases. We have specifically designed high, low, acrylic or glass shower cubicles, but also shower curtain rods which allow for every possible configuration. Last but not least, we offer curtain arms to be attached to the wall or to be placed directly on a wall support.

400 LEVEL ACCESS SHOWER TRAY WITH HORIZONTAL DRAIN, MODEL 430

The measurement indicated must be increased by about 10 cm for the perimeter flange

Material Fibreglass

Colours / Finishes WT

Code	AxBxC [mm]	Weight no.[kg]	€ x 1pc.	€ x 3 pcs.
B40CPS05	900x900x95	3		

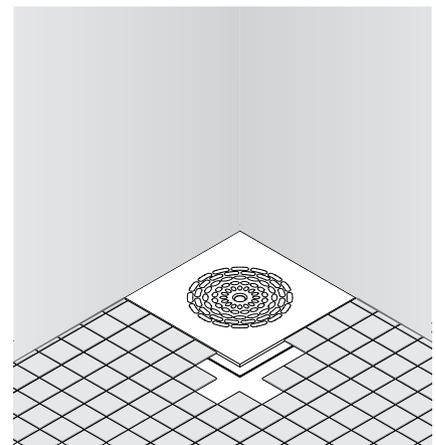

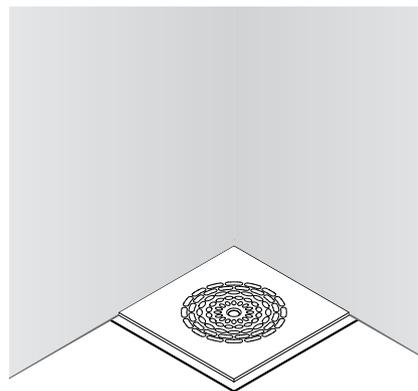

Lowered siphon drain

H52HAS03

The level access fibreglass shower tray B40CPS01/02, features to be installed flush with the floor, features a perimeter edge which extends for about 10 cm with respect to the actual base. This edge is useful for installation because, left under the finished floor plane, it ensures better anchoring and reduces the risk of infiltrations.

Splash guard arm
Wall connection for splash guard arm. The splash guard arm G27JCS48, offers the advantage of allowing for the arm itself to be removed; in this way, the arm can be used in different rooms of the same building.
The advantage of this feature is that the plate system can be installed in each shower area and the arm can be used only when necessary.

Mirrors and lighting

Without doubt, one of the elements that “completes” the bathroom is the mirror; this “adulating” and practical accessory, at the same time, finds its chosen environment in the bathroom. The choice probably seems simple but actually, from size to shape, it proves to be difficult, especially in the case in which there are special needs or even the obligation to meet the requirements of a regulation. Ponte Giulio deals with this as a specialist, offering mirrors with 5 mm thick safety glass, the indispensable minimum for a mirror to be used safely. Therefore the offer includes fixed and tilting mirrors, with or without lever, with or without frame.

STANDARD_ MIRROR, WITH SAFETY GLASS

The mirror must be completed with the mirror holding elements.

Material Glass

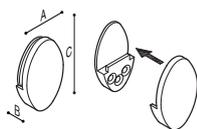

Colours / Finishes

Code	AxBxC [mm]	Weight no.[kg]	€ x 1pc.	€ x 3 pcs.
F41JKS01	∅ 38x10	0.20		

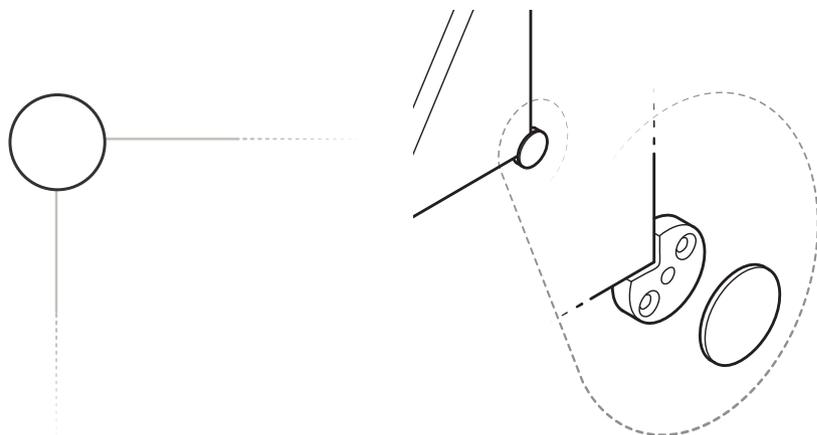

Y90SES61

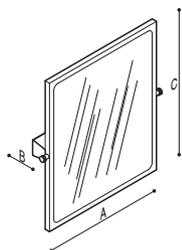

The mirror clip - F17ATN01 - made of polyamide-6, is designed to secure mirrors with a thickness between 3 and 6 millimetres. The item can be used horizontally, vertically or at a 45° angle, with respect to the edges of the mirror. It consists of two parts: one to secure it to the wall, using the screws supplied, available only in black; the other to hide the screw heads, available in the same colours as the handles and other accessories.

The mirror clip - F41JKS01 - is designed to secure mirrors with a thickness between 3 and 6 millimetres. It consists of three elements: a "delrin" disc, to keep the mirror about 3 mm away from the wall; an aluminium disc, to anchor the mirror to the wall using screws, a cover disc, used to block the mirror, made of AISI 304 stainless steel.

PAINT_TILTING MIRROR, WITH SAFETY GLASS

The mirror is equipped with a metal structure that acts as a frame.

Material Glass, Steel

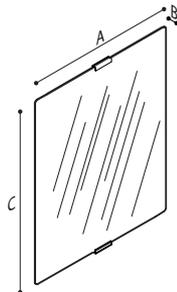

Colours / Finishes W7

Accessories

Furnishings, containers

Each bathroom is integrated and customised with a few elements, sometimes essential, such as a mirror or a shelf; other times, more obvious, a towel holder or a clothes hook. Ponte Giulio offers items suitable for the most diverse contexts, from private to public, from hotels to hospitals, therefore with technical and aesthetic characteristics specific for particular uses, but in any case all of the products are designed to be suitable for a context that enhances safety, rationality and style.

F70ANS03	147x369x54			

The folding shelf - F70ANS03 - is particularly useful for its practicality: it folds down to stop the door and to be used as a practical shelf for bags or objects while the bathroom is being used. Obviously, to exit the bathroom the door has to be opened and, to do this, it is necessary to lift the shelf, so it is impossible to forget what had been placed on it.

Bathtubs

Aid systems for hygiene

Hygiene is the basis of a balanced state of health, to feel good with ourselves and around others, because, in addition to hygiene, water guarantees lightness in movement, psycho-physical well-being, muscle relaxation, the alleviation of painful conditions and better peripheral circulation. Ponte Giulio's offer includes: liftable and fixed bathtubs, watertight or simple showers, shower stretchers and patient lifts to move them correctly from the bed. Chair and stretcher lifts complete the offer related to washing in the bathtub. Useful objects for the protection of the state of health of the operations and essential for moving and positioning the patients. For extreme cases, shower stretchers and shower panels for disinfection, where it is not possible to use items with it built-in.

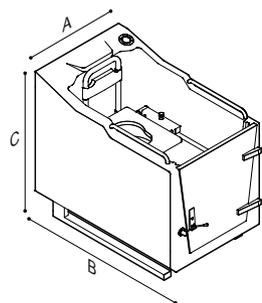

700_WATERTIGHT BATHTUB, EQUIPPED WITH CHAIR WITH BACKREST AND SUPPORT HANDLES MADE OF STAINLESS STEEL WITH SATIN FINISH

Aids

Grab bars and supports

Being “bathroom safety experts”, we wanted to interpret the concept of caring for oneself and others by looking for solutions that would be not only durable and reliable but also pleasing to the eye and touch. We took the first step by taking care of the object that is usually used for safety in the bathroom, in private and public contexts: the grab bar.

PESTIGIO+

Prestigio+ is a line of aids developed mainly to meet adaptability, scalability and customisation requirements; the choice of adopting a simple "cylinder", instead of the classic flange system for wall fixing, and the shape with a cut end, determine its essential and minimalist features. "Prestigio+" aids are elegant, compact and sturdy, they meet the most stringent standards and are made using high quality raw materials. Available in the following versions: single straight, corner, for corner, with or without vertical support. The body of these aids, made of AISI304 stainless steel, guarantees a safe support for anyone using them; they are available with a polished or matte finish or with epoxy powder treatment. "Prestigio+" aids are mainly designed for use in hotel bathrooms, but their simplicity and elegance also make them suitable for private environments.

FIXING SYSTEM

The straight, corner grab bars and grab bars for corners feature a cylinder - \varnothing 31 mm - for wall mounting. In this way, fixing is guaranteed with a single screw, with limited "damage" to the wall.

PONTE GIULIO

SOLO

Minimalist and rational, the SOLO line offers innovative safety grab bars that can be connected directly to a water supply. In addition to offering the security of a certified tensile strength of 150 kgs, these items are real shower columns and shower sets to be installed in new buildings or to replace old products, because all of the items of this line feature an original water inlet system that can indistinctly exploit one of the two flange systems they have, in order to offer greater freedom of choice, in the event of a pre-existing outlet, all without interventions on the brickwork or plumbing. The line also includes horizontal and vertical grab bars and footrests.

THE FLANGE SYSTEM

SOLO shower columns and shower sets are secured to the wall by a flange system that uses an AISI304 stainless steel flange \varnothing 80 mm. One of these is designed to allow for the passage of a threaded fitting with a quick coupling - made of brass - to connect it to the water supply and to secure it to the grab bar body. The other flanges have a special pin, equipped with a quick coupling, used to secure the grab bar body, while sealing the unused inlet.

The grab bars, both in the vertical and in the horizontal version, feature a flange system that uses an AISI304 stainless steel flange \varnothing 58 mm. - equipped with an ABS counter-flange and a stainless steel flange cover \varnothing 65 mm.

HUG

The "HUG" folding arm is characterised by an essential shape, so much that it is suitable for installation either in elegant or functional bathrooms. It is extremely practical, due to the fact that it can be removed from the wall, to offer a context free of aids and therefore suitable both for places where assistance is required and for hotels. This product is the first of its kind to be offered by Ponte Giulio as a "design-for-all" item for the toilet area.

The body of the support is made of aluminium and it is available with three finishes with epoxy-polyester powder and with a polished chrome treatment. The item can be equipped with a soft arm rest padding, made of polyurethane, and a toilet roll holder, made of stainless steel.

THE FLANGE SYSTEM

Unlike any other folding grab bar offered by Ponte Giulio, for this item there is a wall mounted stainless steel bracket on which a flange is inserted, which integrates a plate and a hinged joint that allows for the arm to be folded.

This system allows for the grab bar to be removed, leaving just the bracket attached to the wall. Once the grab bar has been removed, the bracket can be concealed by covering it with a plastic casing, available in four finishes, the same as the grab bar.

NOTE

The support arm can be chosen independently of the colour of the plate covers. When ordering, please indicate the colour of the arm, replacing **xx** with your preferred reference. In the same way, replace **XX** with your preferred reference. Both are in the table next to the drawing.

xx refers to the colours of the arm

XX refers to the colours of the plate cover

The folding arm - G18JCS07/08/09 - is anchored to the wall by means of a plate. The arm itself is fixed to a half-plate, equipped with a joint. This technical choice allows for the support to be easily removed from the wall anchoring plate. Once the support has been removed, the wall plate, which remains attached to the wall, can be protected by an elegant ABS cover.

FAMILY

The "Family" line has been designed with the desire to make a simple grab bar "multi-use". For basic straight bars, which can be used as simple towel holders, can turn into furnishing accessories, integrating shelves, hooks or other functional elements. The body, made with a square section AISI304 stainless steel profile, equipped with a simple cylinder for wall mounting, makes these items refined in their simplicity, for use mainly in the home.

FLANGE SYSTEM

The grab bars features a cylinder "system" for wall mounting; in this way, fixing is guaranteed with a single screw, with limited "damage" to the wall. Most of all, this allows for a refined and extremely "minimal" aesthetic result, while maintaining an important load-bearing capacity.

Whereas all the accessories are available in the following finishes **W2 warm white, D8 oxide grey.**

Seats

Shower seats, stools and benches

Before being useful accessories, a chair or a stool are furnishing elements. Of course, it is best if they are above all reliable, functional and made with quality raw materials. Ponte Giulio has always put this characteristic first, mainly taking into account the user's safety; seats intended for private or public environments must offer style and comfort, so that the time spent in the bathroom brings a feeling of well-being.

The seat can be removed from the wall on which it is installed. This is guaranteed by a plate system featuring a flange to be anchored to the wall and a plate integral with the chair itself. The advantage of this feature is that the plate system can be installed in different shower areas and the chair can be used only when necessary.

Sanitaryware

Toilets, bidets, washbasins, tanks
and sanitary modules

Choosing a bathroom fixture can prove to be a very complicated task, in fact it is not easy to decide which style is best: classic, contemporary, square, rounded; or to choose between the different forms of installation: high, space-saving, floor-mounted or wall-mounted. Ponte Giulio offers bathroom fixtures with very obvious features: large and comfortable seating surfaces, fixtures with a high seating surface and a style suitable for any environment.

A traditional toilet, in order to comply with the standard for use by disabled people, must be installed in such way that the front part is at least 75 cm away from the wall. This compensation space between the toilet and the wall can become a technical "space" for the connection of the drain and water supply.
For details and suggestions, contact Ponte Giulio.

A traditional toilet, in order to comply with the standard for use by disabled people, must be installed in such away that the front part is at least 75 cm away from the wall. This **compensation space** between the toilet and the wall can become a technical "space" for the connection of the drain and water supply. For details and suggestions, contact Ponte Giulio.

Items F47AIS02 and F47AIS01 are available in the colours BZ, IB, WD

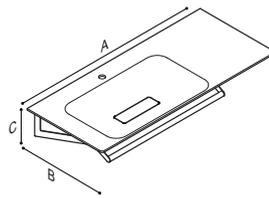

The console sink - B46CMR (L) 22 - made of acrylic stone (solid surface) - is attached to the wall on metal brackets, using dowels and screws. The item features a special bracket to support the lateral top. It must be purchased, mandatorily, if only the console sink is ordered. Should you choose to purchase the drawers or the single drawer, the bracket is not necessary because it is supplied with these items.

Shower

Shower trays, enclosures and accessories

The shower area for private environments must be configured according to the composition of the family unit and therefore also according to the age of the users. For children, but also for the elderly, if there is no handle and a seat in the shower, it may be dangerous. Ponte Giulio, who has always given extreme importance to safety, offers a selection of items designed to furnish and configure this specific area of the bathroom, to make it comfortable, elegant and safe.

A 23
p.406

The presence of the retracted reinforcement profile allows for further adaptation during installation, thanks to a 40 mm adjustment surface for the entire perimeter of the base. This solution allows for the base to be installed either "above" the ground or "flush with the floor". In the case of installation "above" the ground, the access step is reduced to only 12 millimetres.

HUG SQUARE SHOWER TRAY

Tray made of resin-bonded and natural stone composite, characterised by a surface with raised dots.

For the shower enclosure, see pages 169-173 and 303-308 of this document.

ACCESSORIES

Furnishings, containers

There are some contexts in which, rather than using simple accessories, it would be wiser to choose useful containers for items that are used in the bathroom: from linen to various trinkets. Of course, if these objects could also guarantee a valid support for people with mobility problems, they would prove to be very useful. Ponte Giulio has also thought about this for those who want to be able to use the bathroom independently.

Bathtubs

Aid systems for hygiene

The pleasure of having an invigorating and relaxing bath, as well as the simplest daily hygiene, becomes simple and natural thanks to our bathtubs with doors, because it can be done safely and independently. Easy access bathtubs makes life easier for those who use it, but also for those who assist. All bathtubs are designed to minimise inspections and maintenance, offering, on the other hand, many customisation possibilities. This is to meet all types of needs, whether related to the room in which it will be installed, often with little space, or to the physical and health conditions of the end user. The version with external opening - models 651 and 652 - thanks to the wide opening, allow for practical access, making it safe, functional and unique in its kind.

All Ponte Giulio bathtubs with doors are “made in Italy”, both the components and the manufacturing.

651_ BATHTUB WITH DOOR WITH OUTWARD OPENING, EQUIPPED WITH GRAB BAR ON BATHTUB BODY

The bathtub features a system for the easy opening of the door by means of a lever placed on the bathtub body. The bathtub is equipped with height adjustable feet which allow for a stroke of 45 millimetres. The shower curtain rod, and relative ceiling supports (optional) are available in the following colours: B1,B2, D1,D2,D4,G1,G2,I1,I2,P4,R1,R7,W1,Y1,Y3.

Mirrors and lighting

Completing the bathroom with a mirror not only makes the room unique in style but also increases the level of comfort. Tested to withstand humid environments, our bathroom mirrors are practical and give light to the room, making it more spacious. Some have built-in lighting, others can be equipped with lighting fixtures, all use LED technology. This type of lighting, in addition to saving energy, offers a homogeneous light source.

Product kits

This section includes a series of offers that are intended “ready for use”, where everything required for installation is included.

The “philosophy” on which the offer is based is to offer a “solution” rather than a simple “item”; the company presents “product packages” so that, regardless of the interlocutor, there are no errors and nothing is forgotten because a single code identifies everything required. The “kits” offered represent a combination of product and service, emphasising the specialisation that Ponte Giulio has acquired in over twenty years of experience. The customer gains time and, above all, a complete solution, ready for use and selected by a specialist.

Fixing systems

The anchors are distinguished according to their operating principle, the material they are made of or the basic support of the installation. In general, they can be divided into two types: mechanical and chemical; mechanical anchors resist by exploiting the friction between the materials. Chemical anchors resist by exploiting the bond that is created between a synthetic resin, the base material and the anchor bar. In this section of the price list we have chosen to offer only mechanical anchors; alongside a selection of traditional anchors, some other excellent ones, in terms of characteristics, quality and practicality, have been chosen. Remember that the "aids" must be attached to walls by qualified expert personnel, who are responsible for choosing the most suitable fastening elements according to the wall on which the aid must be installed.

FASTENING ELEMENTS FOR LIGHT WALLS

Wingits®, the strongest anchor system for light walls in the world.

Characteristics

No reinforcements are required on the walls.

- It does not lose its holding capacity.
- It is fire resistant and does not fear contact with water.
- It has unmatched strength.
- It has been used for over 15 years in the USA.
- Used by the most important American hotel chains.

Fast installation

It is installed in a few seconds and it is stronger than a fastening element on a concrete wall.

TRADITIONAL FASTENING ELEMENTS

Fastening elements with nylon dowels can be used in concrete, solid and perforated bricks and plasterboard.

They consist of a bush with expanding sections, coupled with a steel screw. For approved systems, each dowel is associated with a special screw, in order to obtain maximum tightness. Due to the sensitivity of the plastic material to temperature, it is normally necessary for the temperature not to drop below 0°C during installation.

6X70 FASTENING ELEMENT

Spare parts

This section lists the components of the products in order to allow for a product to be repaired, before purchasing a new one.

We believe that this also means respect for the environment and containment of costs, in particular for the end user. The choice was made on the basis of experience, rather than on the basis of the type of product, considering that for anything that is not found on the following pages, it is possible to contact the Ponte Giulio technical department for advice.

In-depth information

Describing, in a sufficiently detailed and clear manner, the most interesting characteristics and the advantages that a product can offer, or more simply the special features that make it useful or different from others available on the market, is always relatively hard, even more so in a document like a “price list” which, by its nature, requires synthesis and simplicity.

However, whenever we find ourselves in the condition of having to “choose”, having access to more information helps us decide between one item and the other; this section includes more specific ideas, suggestions and information, useful to “understand” a product, discover how to use it in the best way possible and appreciate its functionality. In a certain way, it is a “vademecum” with the purpose of offering both technical and functional information, which we believe may prove to be useful.

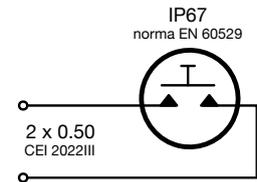

01

Control buttons for folding supports

Why choose them

- Extremely comfortable because easy to reach
- Operated with minimal movements
- Avoid movements or twisting
- Minimum operating pressure

The folding supports, usually used near a toilet, can be equipped with single-pole, single-contact type buttons, useful to flush the toilet or activate an alarm. These simple "ON/OFF" switches, activate an electrical circuit simply by pressing them. Remember that these buttons are only suitable for low voltage circuits.

02

Pneumatic flushing controls for folding supports

Why choose them

- Extremely comfortable because easy to reach
- Operated with minimal movements
- Avoid movements or twisting
- Minimum operating pressure

The folding supports, usually used near a toilet, can be equipped with pneumatic buttons to flush the toilet. Ponte Giulio offers two different pneumatic control solutions, one adopts an "OLI" model and the other adopts a "Geberit" model. When ordering, we suggest checking next to which tank the support will be installed.

Pneumatic control "Geberit" model

Y90SES61

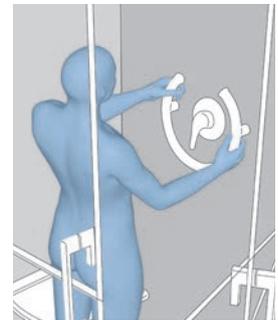

03

Round grab bar

Why choose them

- You can choose the colour according to the colour of your bathroom
- Compact in size
- Real non-slip device for your shower
- Non-invasive

The round "grab bar" has been designed for installation near the shower faucet to provide a secure "grip". In this way, you can easily turn the faucet with one hand while holding on to the grab bar with the other, or find a valid support if you fall.

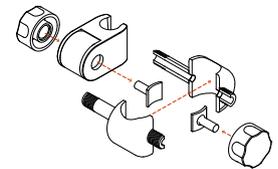

04

Shower holder

Why choose them

- Compact in size
- You can choose the colour according to the colour of your bathroom
- They turn a grab bar into a sliding rail for your shower
- They can be applied to all our round section grab bars
- They can also be installed later without having to dismantle the grab bar

Thanks to the "body" designed in two "shells", the Ponte Giulio shower holder can be installed, in a simple and practical manner, on any "grab bar". The shower holder is available both in ABS, with a chrome finish, and in polyamide, in the standard Ponte Giulio colours.

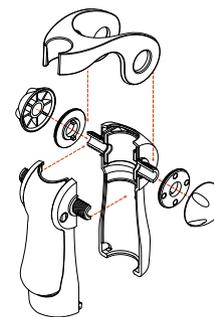

05

Shower holder with ergonomic handle

Why choose them

- Compact in size
- You can choose the colour according to the colour of your bathroom
- They turn a grab bar into a sliding rail for your shower
- They can be operated without having to squeeze
- They can be applied to all our round section grab bars
- They can also be installed later without having to dismantle the grab bar

Thanks to the "body" designed in two "shells", the Ponte Giulio shower holder with ergonomic handle can be installed, in a simple and practical manner, on any "grab bar". The particular shape with a built-in ergonomic handle offers excellent grip and makes it easy to slide the shower holder vertically even for people who have limited hand movements. The shower holder is available both in ABS, with a chrome finish, and in polyamide, in the standard Ponte Giulio colours.

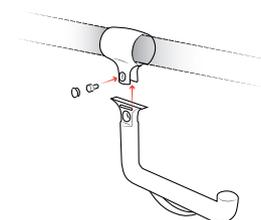

06

Toilet roll holder for installation on an aid

Why choose them

- They can be installed on all round section grab bars
- They can also be installed later without having to dismantle the aid
- They allow for the toilet roll holder to be placed in a convenient position as needed
- You can choose the colour according to the colour of your bathroom

The particular design of the fixing "bracket" with which the toilet roll holder is equipped, allows for it to be fitted on any handle, even one already in use. The body of the toilet roll holder, made of polyamide-6, features an "elastic" "delrin" element, which allows you to "brake" the rotation of the roll once it has been placed on the roll holder. The item is available in the standard Ponte Giulio colours.

Y90SES61

© Ponte Giulio - Price list 20/2020

07

Removable containment crossbar for folding supports

Why choose them

- They are a valid solution to give stability
- They ensure autonomy and privacy, by avoiding the presence of an operator

The containment crossbar, once installed transversally on two folding supports, ensures a comfortable and safe frontal support to those who, for different reasons, are not able to stay upright while sitting on a toilet. The anchoring system, designed for the crossbar, features two joints to be secured on both supports, and two "knots", equipped with pins", placed on the crossbar itself. The crossbar can easily slide along the length of the supports, and then be blocked for use.

08

Folding armrests

Why choose them

- Non-invasive
- In addition to a secure grip, they also offer a comfortable support for the arm
- You can choose the colour according to the colour of your bathroom
- To be recommended to people who are unstable even when seated

An armrest is an effective and fast solution to add safety to any bathroom. You can choose to install it next to a toilet, to improve the use of the shower or simply to have a support next to the washbasin. Ponte Giulio offers an armrest with technical and aesthetic characteristics that make it suitable for any style, and any context; the external body made of thermoplastic resin, in one piece, is characterised by an ergonomic shape and its surface is treated with a slightly embossed finish to improve the "grip" and the friction.

An armrest is usually installed next to a toilet.

One of the most useful uses is the installation of an armrest beside a shower chair.

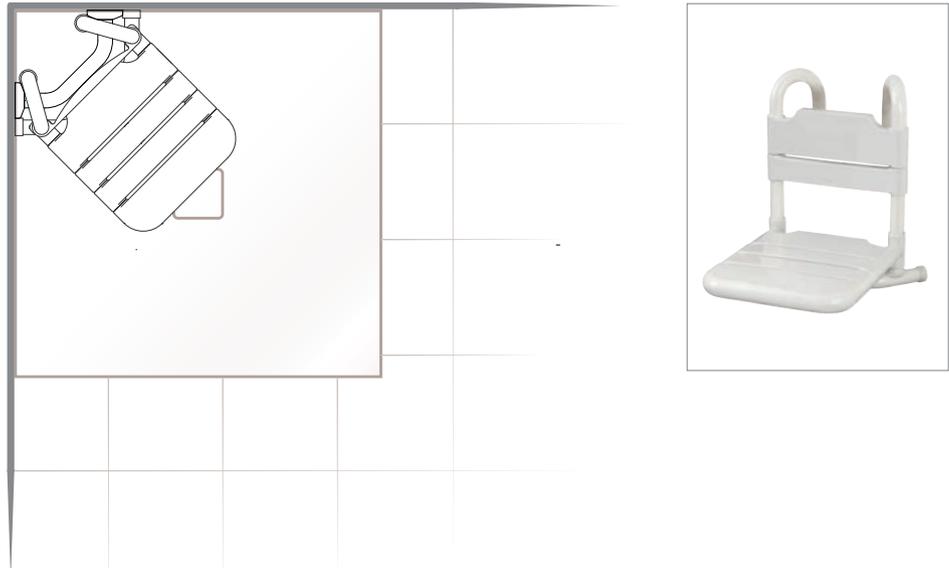

9

Shower chair for corner installation

Why choose them

- They use a space that is otherwise unused
- They can be installed even in a small shower
- You can choose the colour according to the colour of your bathroom
- Made entirely out of antibacterial materials

The removable shower chair, for corner installation, allows for you to optimally use the space available in the shower. The chair can be secured both to the specific corner grab bar and to any other type of corner support.

10

Folding chair for bathtub

Why choose them

- They make it safe to get into the bathtub
- They allow for the bathtub to be made safe without necessarily removing it
- When not in use, it remains against the wall so it does not take up any space
- You can choose the colour according to the colour of your bathroom
- Made entirely out of antibacterial materials

The chair makes it easy to get into the bathtub to be able to use it safely. The “folding” function allows to free up space in the bathtub when it is not in use, but at the same time it avoids annoying and unnecessary handling that may discourage its use in case of need. It is clear how even an agile person is able to appreciate the functionality of this product which allows you to get into the bathtub safely and comfortably.

Y90SES61

© Ponte Giulio - Price list 20/2020

11

Extensible shower screen

Why choose them

- They facilitate assisted washing
- They prevent the operator from getting wet
- Combined with a curtain, they close the shower completely

The shower screen, consisting of two doors, in turn divided into panels, can be folded against the wall in order to make the best use of the space. When the doors are opened or

closed, the hinge, equipped with a cam, will be lifted off the ground to avoid wear of the gasket.

12

Extensible and liftable screen

Why choose them

- They facilitate assisted washing
- They prevent the operator from getting wet
- Combined with a curtain, they close the shower completely

The screen designed to be secured on a single wall, features a system of folding and extensible panels. This allows for it to be folded against the wall in order to make the best use of the space. The shower can also be fitted with a panel, optional, to allow for wall installation with three free sides. The panel is equipped with a hinge, with a hydraulic lifting mechanism, useful both for easy handling and adaptation and to avoid wear of the gasket.

13

Shower curtain rods

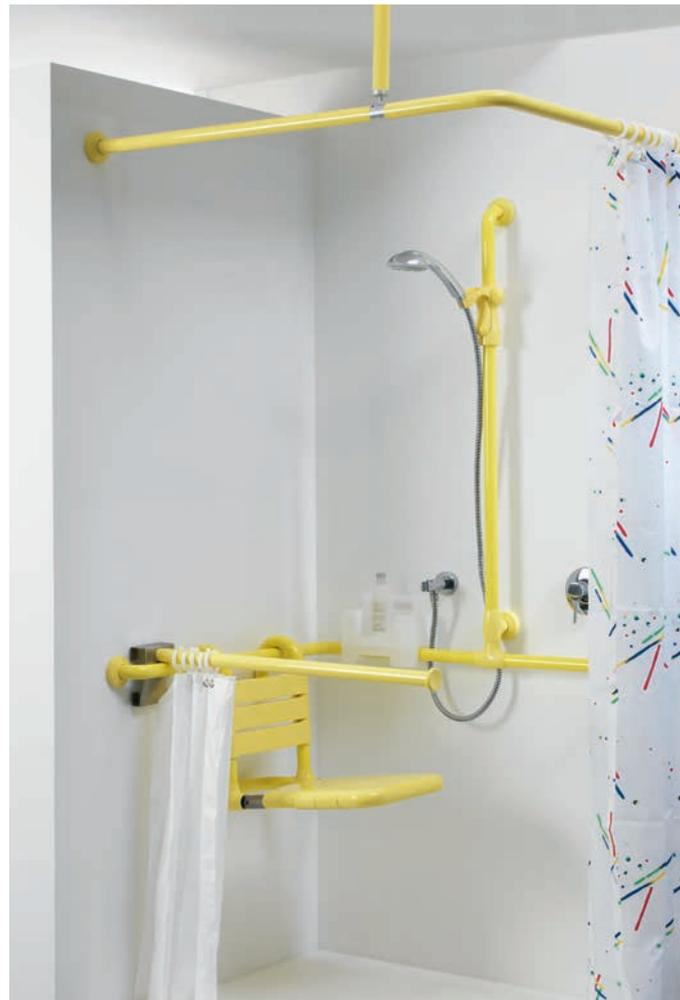

Why choose them

- Can be coordinated with all of the colours of the aids
- They avoid the installation of an additional shower cubicle with guides which would represent a barrier
- They offer maximum access space since they have no fixed parts
- Particularly suitable for professional healthcare, used by people in need of assistance

The shower curtain rods offered by Ponte Giulio feature an aluminium structure and an external polyamide body. The union between the different elements is guaranteed by "delrin" couplings in order to allow for maximum customisation.

To simplify installation and use, specific accessories are offered:

- 180° articulated connection
- Connection with controlled release - up to 35 kilograms in weight.

Joint for curtain rod

Joint with 180° articulated connection

Controlled release joint, 35kg

Y90SES61

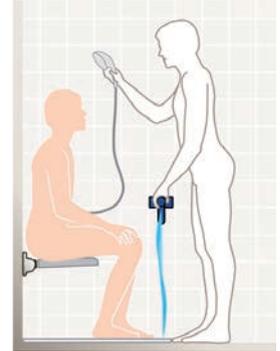

14

Curtain arms

Why choose them

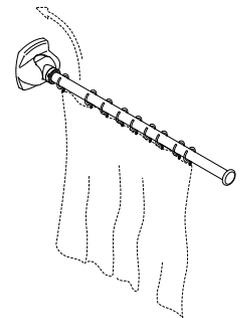

- Essential for showers with a curtain
- Customisable in various solutions and colours
- Made of antibacterial materials

Ponte Giulio offers some curtain arm solutions, useful in professional contexts such as hospitals or assisted living facilities, where patients often need to be assisted while being washed.

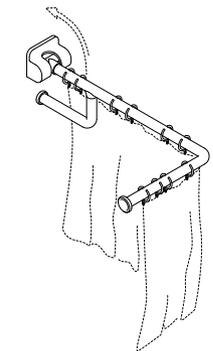

Folding curtain arm with removable rod.

An elegant solution that allows for the arm to be completely removed from the joint secured to the wall, thus offering the possibility of using the same curtain in different contexts.

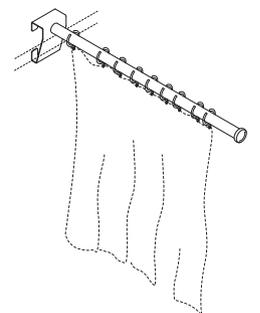

Corner folding curtain arm.

This type of solution offers greater protection to those who offer assistance.

Removable curtain arm.

It represents the easiest solution because it is designed to be used resting on any safety support which would normally be present in a shower area.

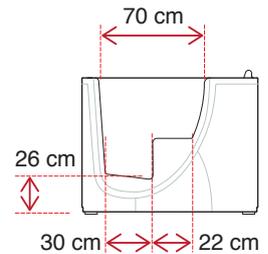

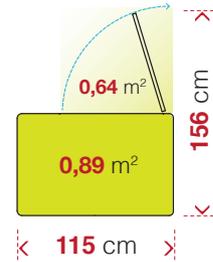

15

Bathtub with door, outward opening

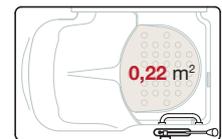

Why choose them

- Wide opening
- Allows for access both standing and sitting as part of the seat is freed
- Guarantees autonomy and privacy
- Particularly suitable for people with reduced motor skills or robust build

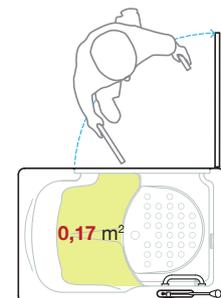

The bathtub with door, featuring outward opening - models 651 and 652 -, is particularly suitable for people with slight motor limitations or a robust build. The shape of the door guarantees a wide space for access, even in the lower part intended for the feet where other models usually offer more limited dimensions. It also frees up a portion of the seat, which therefore becomes easily accessible. The advantage of having a wide opening for access, on the other hand, requires a lot of space on the side facing the door, so this type of bathtub can only be installed in fairly large rooms.

The width of the door makes a sufficient portion of the seat accessible, so it is possible to enter the bathtub either standing or sitting, making it the only one of its kind.

The useful surface for the feet, which is about a quarter of a square metre, is enough to be able to use the shower while standing.

The large door that opens outwards, on the other hand, requires quite a lot of space. (Space to be checked before purchase).

16

Safe shower set

Why choose them

- Grab bar body made of a 32 mm diameter tube Stainless steel
- Anti-scald cold tube
- Multi-purpose handheld shower
- Vertically adjustable shower sliding rail
- Double inlet system for the "DWI SYSTEM" water intake.

The SOLO shower set guarantees functionality combined with safety; it is much more than a traditional sliding rail, it is unique because it allows you to hold on to it safely when required. Our products comply with the ADA (Americans with Disabilities Act) guidelines, among the most stringent in terms of balance between design and safety.

The body of the column remains cold even in the presence of hot water, thanks to an innovative channelling system.

The body of the column always remains cold thanks to a water channelling system, thus preventing burns and ensuring maximum comfort.

17

Safe shower column

Why choose them

- Grab bar body made of a 32 mm diameter tube Stainless steel
- Anti-scald cold tube
- Adjustable shower arm
- Multi-purpose handheld shower
- Vertically adjustable shower sliding rail
- Double inlet system for the "DWI SYSTEM" water intake.
- Possibility to have it with the horizontal safety grab bar both on the right and on the left.

The bar that makes up the SOLO shower is a safe and discreet aid that allows you to hold on to it safely when required. Our products comply with the ADA (Americans with Disabilities Act) guidelines, among the most stringent in terms of balance between design and safety. The body of the column remains cold even in the presence of hot water, thanks to an innovative channelling system.

The body of the column always remains cold thanks to a water channelling system, thus preventing burns and ensuring maximum comfort.

18

Bathtub with door,
inward opening

Why choose them

- Guarantees autonomy and privacy
- To be chosen in cases where it is not possible to install a bathtub with outward opening due to limited space
- Suitable for people of normal build
- It features models with built-in shower siphon
- It features a very compact model (656)

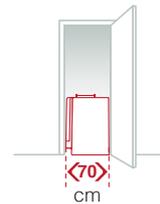

To solve the need to be able to install a bathtub with a door even in confined spaces, Ponte Giulio offers the version with inward opening, and in particular the compact model - 656 - characterised by a reduced depth, which allows for it to be installed even in the place of your old shower or traditional bathtub. Bathtubs with doors opening inwards are about 15 cm longer than the versions with doors opening outwards offered by Ponte Giulio. In this way, the space required to open the door is obtained, as well as the space required for the feet and to move about a little. Usually this type of bathtub is recommended for people who can move easily, with a normal build, and it can be installed in rooms that are not particularly large.

The bathtub with door - model 655 - offered by Ponte Giulio, has been designed to allow for it to be installed in two ways: either normally like any other one on the market, or with a built-in drain. The latter form of installation offers the opportunity to reduce the height of the step by 8 centimetres with respect to the floor, thus making it easier to access.

Inside, the bathtub features a large support surface, on which you can stand thanks to its non-slip effect.

With a maximum width of 70 cm, the bathtub with door model 656 - M74MDS21 - allows for easy handling even in confined spaces.

19

Sanitary modules for washbasins

Why choose them

- They avoid building works
- They allow the use of existing hydraulic systems
- Custom sizes

For interventions in the washbasin area, Ponte Giulio offers products and solutions that are suitable to solve almost any constraint, while allowing for a refined customisation in terms of shapes and dimensions.

For this purpose, Ponte Giulio offers:

Washbowls, washbasins and console sinks made of sanitary porcelain;

Washbasins, console sinks, washbasin surfaces and shelves made of acrylic stone;

Sanitary modules for washbasins; **A**

Under-sink sanitary modules **B**

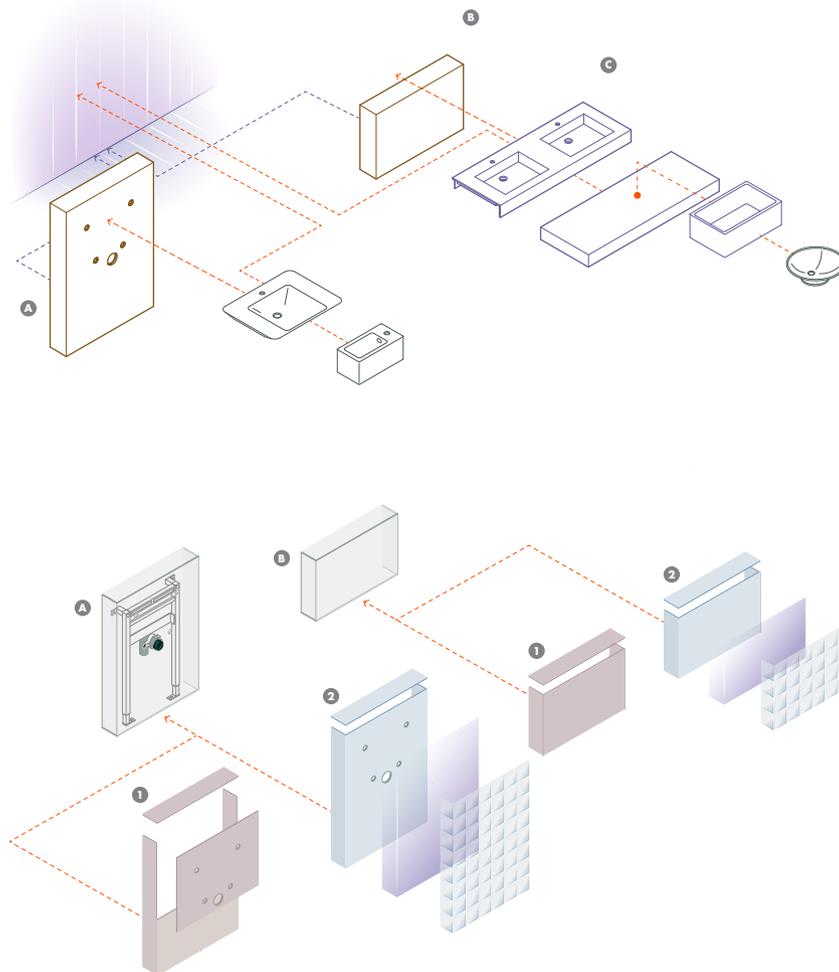

The sanitary modules are offered in high-pressure laminate (HPL) **1** and in cellulose fibre (gypsum fibreboard) **2**.

The laminate versions offer the advantage of being inspectable, thanks to the removable front and top panels, but above all ready, with the finish chosen by the customer, to

be installed, thus minimising installation operations. The cellulose fibre versions allow for endless customisation possibilities with any type of coating or finish.

Sanitary modules for washbasins **A** allow for sanitary porcelain (Vitreous-china) washbasins, console sinks and washbowls to be installed on the modules themselves, while creating a practical support shelf.

The under-sink modules **B**, designed to house the technical drain and intake fittings, offer the advantage of allowing for the washbasins to be positioned freely, avoiding the limitation imposed by wall installation.

Y90SES61

20

Sanitary modules for toilet

Why choose them

- They avoid building works
- They allow the use of existing hydraulic systems
- Custom sizes

For interventions in the toilet area, Ponte Giulio offers products and solutions that are suitable to solve almost any constraint, while allowing for a refined customisation in terms of shapes and dimensions.

For this purpose, Ponte Giulio offers:

Toilets and bidets made of sanitary porcelain

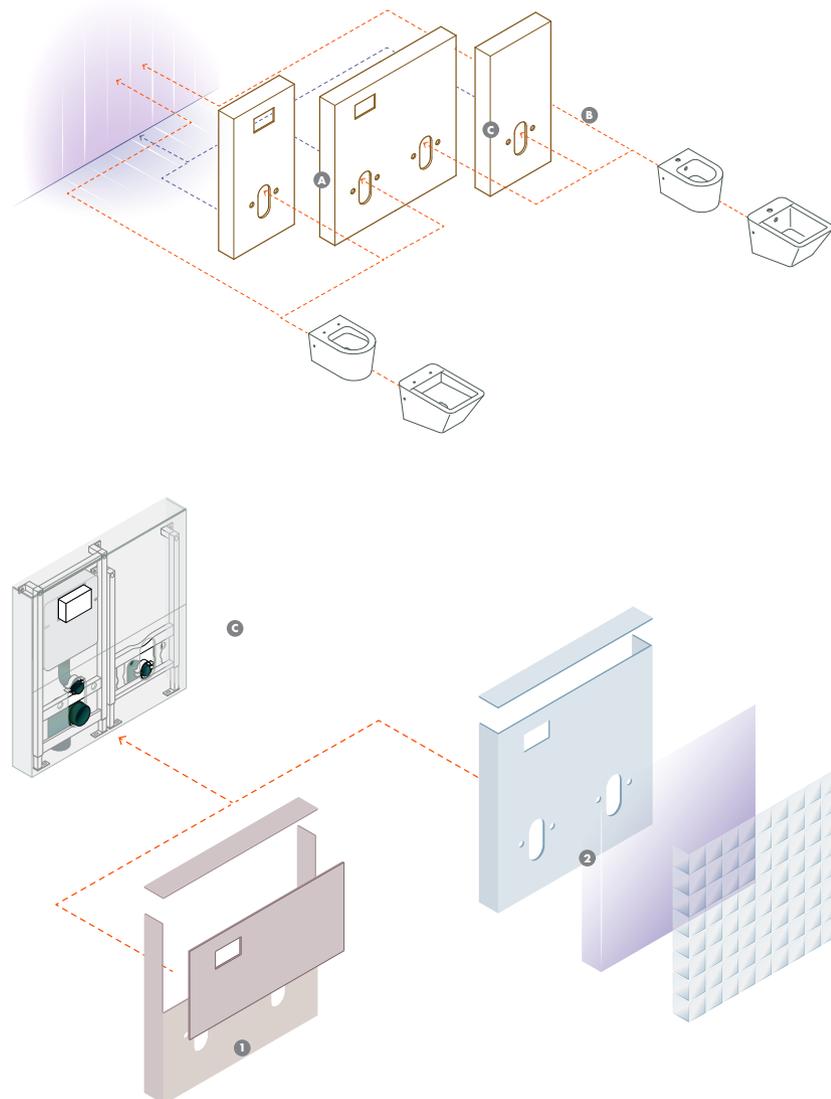

Sanitary modules for toilets; **A**

Sanitary modules for bidets; **B**

Combined sanitary modules; **C**

The sanitary modules are offered in high-pressure laminate (HPL) **1** and in cellulose and gypsum fibre (gypsum fibreboard) **2**.

The laminate versions offer the advantage of being inspectable, thanks to the removable front and top panels, but above all ready, with the finish chosen by the customer, to be installed, thus minimising installation operations. The cellulose fibre versions allow for endless customisation possibilities with any type of coating or finish.

21

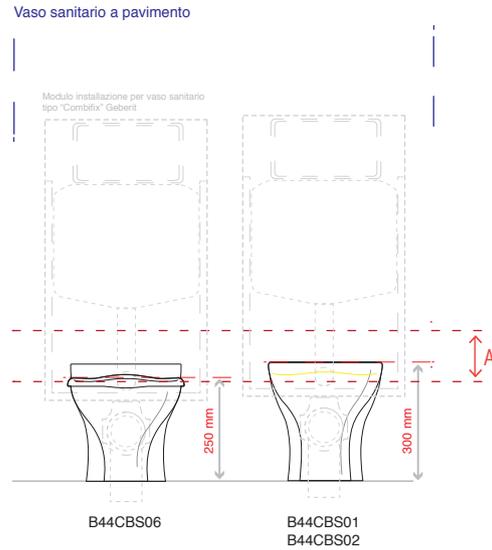

Installation of bathroom fixtures intended to be used by children

Why choose them

- Child-friendly
- Combined with the whole line, they allow you to create playful environments
- Different sizes based on the age of the children, 0/3 years and 3/5 years

The toilets intended for children offered by Ponte Giulio are compliant for fixing with installation modules such as "Geberit" or similar.

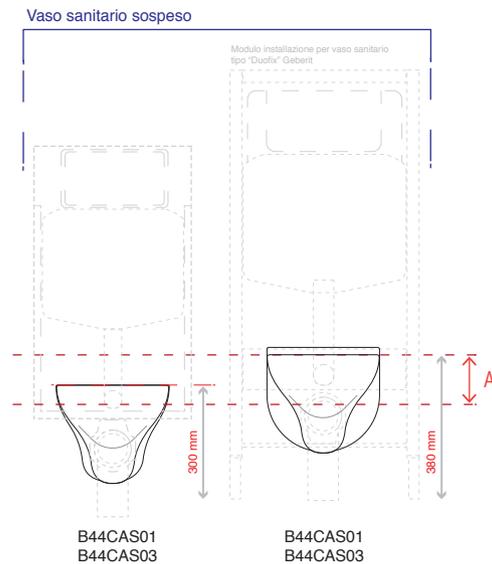

These items, designed for children aged between 3 and 5/6 years, need to be installed at a suitable height, between 250 and 380 millimetres from the ground.

22

Ergonomic console sink "Older"

Why choose them

- They offer an important support surface
- The front edge is shaped like a grab bar and offers a good grip

The lower edge of the console sink, which follows the entire perimeter of the fixture, features a relief which can be used as a grab bar, adding safety to environments used by people with mobility problems.

The view from below shows the projection of the lower edge to offer adequate grip.

The view from above shows how easy it is to grab the edge.

28

Characteristics of acrylic stone

Why choose them

- Eco-friendly
- Uniform
- Hygienic
- Long lasting
- Resistant
- Repairable

Acrylic stone is a non-absorbent and non-porous composite material, resistant to direct sunlight. Its colour remains substantially unchanged over the years. Durable over time, it resists well to normal stresses caused by daily use. These qualities make it suitable for any outdoor or indoor use, allowing an endless variety of solutions in terms of shapes and colours.

There are also a series of "translucent" colours, used to obtain effects of transparency.

23

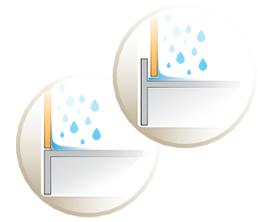

Shower base with "splashback"

Why choose them

- particularly suitable for restoration works
- Customisable in shape and colour

An important characteristics of the acrylic stone shower base with splashback is the guarantee of water tightness; the combination of the coating with the base, equipped with a built-in containment profile - splashback -, avoids the use of silicone or other sealants which are essential for all traditional shower bases.

In this way, any possibility of infiltration between the base and the coating itself is eliminated.

A traditional shower base requires sealing between the base and the coating. The solution with base equipped with lateral containment profile - splashback - does not require sealing.

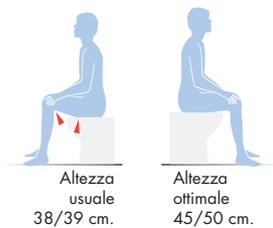

24

Toilets with a height of 50 centimetres

Why choose them

- Simple to sit down
- Easy to get up
- Less discomfort in the legs
- Suitable for anyone

The toilets and bidets offered by Ponte Giulio usually have a height from the ground greater than 450 millimetres.

25

Shower cubicle
with split doors

Why choose them

- They facilitate assisted washing
- They are a valuable finish for domestic environments
- That allow for the use of the shower area for all ages and needs
- Customisable in terms of dimensions

When you decide to install a shower cubicle, an important fixture in a bathroom, you should choose one carefully and before its aesthetic value, which can be subjective, it is appropriate to consider technical/practical factors that can improve the use of the product; among others, it is necessary to consider the possibility, or need, for people with physical limitations or children to use the shower. For this purpose, Ponte Giulio offers shower cubicles with split doors, which allow for both traditional use and assisted use, thanks to the door divided into two parts; by opening the top part and leaving the bottom part closed, the operator can assist the person inside the cubicle from outside, without getting wet, and without flooding the bathroom.

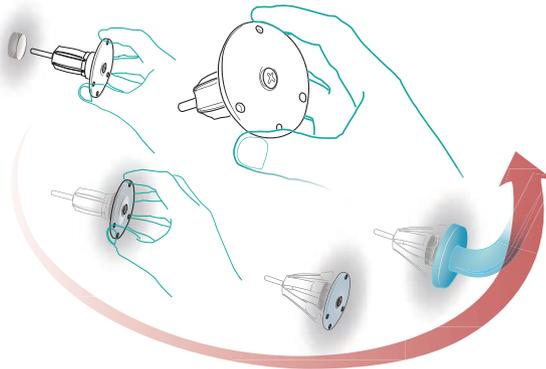

26

Fixing systems for light walls

Why choose them

- They eliminate the need to provide reinforcements in the wall
- They do not lose their anchoring resistance over time
- Flame retardant and waterproof
- Suitable for the installation of any safety aid and accessory
- Protected by an international patent
- In use for over 15 years in the hotels and residences of the most important hotel chains in the United States

One of the most frequent problems encountered every time a product needs to be installed on light walls, such as plasterboard, is the fragility of the wall itself. On this type of walls, if there is no reinforcement inside, where the product needs to be installed, it is necessary to resort to special solutions, such as chemical anchors, and sometimes it is not possible to install the product at all. To solve this problem, Ponte Giulio offers what is probably the most resistant and reliable fixing system available on the market for the installation of accessories and aids on light walls.

Y96SES65

Y96SES56

27

Aids

Why choose them

Versions with external coating

- Warm to the touch
- Non-slip
- Without junction points between straight and curved parts
- Customisable in terms of size and colour

Versions with surface treatment

- Against vandalism
- Without junction points between straight and curved parts
- Customisable in terms of size

Ponte Giulio has chosen to offer a wide range of supports, in terms of shapes and styles, intended both for the needs of the professional market and for private use. Ponte Giulio aids meet the most stringent standards, are made using quality raw materials and are designed to last over time.

The aids offered by Ponte Giulio can be classified as follows:

With external coating

Tubocolor
Urban People

With surface treatment

Family
Prestigio
Prestigio +
Polished stainless steel
Paint

Y90SES61

28

Rilsan

Why choose them

- Chemical resistance
- Very smooth surface finish
- Abrasion resistance
- Resistance to hydrocarbons
- Resistance to ageing
- Flexibility

RILSAN PA11, as it is technically defined, is more specifically a biopolyamide of vegetable origin derived from castor oil, therefore respecting the environment and completely recyclable. This material has innumerable potentials; among the most significant are its excellent abrasion resistance and excellent resistance to chemical aggression and hydrocarbons, without neglecting its good electrical insulation capacity. Like any "thermoplastic" synthetic material, it can be applied either electrostatically or by immersion in a fluidised bed.

29

Biocote®

Why choose them

- Active 24 hours a day
- Full protection against microbes
- Reduced microbial levels, even up to 99.99%.
- Effective against a large variety of microbes
- Active for the expected life of the product

Biocote® is an antimicrobial chemical technology capable of preventing, therefore reducing, the risk of contamination by bacteria on the surfaces and materials to which it has been applied. The action of Biocote® is permanent, it guarantees intrinsic protection during the expected life of the products, thanks to a continuous action against microbial colonisation. The additives and therefore the products that are treated with Biocote do not make bacteria resistant to antibiotics. Biocote has been shown to reduce the number of bacteria on a product by up to 80% in 15 minutes and up to 99.5% in only 2 hours. but above all it has been shown to reduce the presence of microbes on a protected product up to 99.99%

Microbes cause all infectious diseases; on average 1 death out of 4, globally, can be traced back to their activity.

- Bacteria such as MRSA and Escherichia Coli can survive on hard surfaces for many months, resulting in possible cross-contamination.
- Microbes such as mould can extract nutrients from materials and compromise their properties and performance, causing early product failure.
- The materials on which BioCote® technology was used have proven the ability to deactivate viruses both enveloped and non-enveloped.
- BioCote® Antimicrobial technology has proven effective against many microbes including: Staphylococcus aureus, Escherichia Coli, Salmonella, Listeria, Legionella, Campylobacter, Pseudomonas, Shigella, H1N1 virus, Aspergillus Niger

DESIGN AND ANALYSIS OF NEEDS

Being close to the customer, in particular for structures such as hotels, nursing homes and hospitals, is an approach that is part of the Ponte Giulio culture. The availability of our technicians to assist designers and installers represents the added value of our company. Based on the information and data acquired during the analysis phase, the design guidelines are defined, which will allow for the project to be completed, the executive drawings of which, once the installation phase has been completed, will be archived and kept by Ponte Giulio to guarantee future replacements or implementations.

LOGISTICS

An essential tool, for a modern sales service, is the correct management of logistics services. The organisation of Ponte Giulio's internal warehouse allows normal shipping times for each product on the price list in 5 days from receipt of the order.

DOCUMENTS

Ponte Giulio works daily to update and implement information and data on its products and services; in addition to the traditional paper-based documents, the company offers the possibility of accessing data to anyone from the network by means of the company website. For some years now, Ponte Giulio has developed its own database by means of which it updates the data available in the network in real time. For this reason, before developing a design, or carrying out an installation, it is advisable to check the data found at www.pontegiulio.it.

GENERAL CONDITIONS OF SALE

1. Ponte Giulio S.p.A. reserves the right to change the products dimensions and any technical features without any prior notice.
2. Prices are EXW factory Orvieto, Italy.
3. Prices might change without any prior notice.
4. Goods travel at customer's risk. The receiver will inspect the products upon their delivery and report any damages to the forwarder. For the packaging of ceramic materials on pallets and/or in suitably reinforced cardboard boxes, there will be a 1.5% charge for the packaging.
5. If the receiver is unable to check the goods upon their delivery, he can accept them and report any damages within 8 days.
6. Ponte Giulio S.p.A. reserves the right to make partial shipments. Ponte Giulio S.p.A. will meet the shipping terms except in those cases due to force majeure or beyond the will of Ponte Giulio S.p.A. such as curtailments, strikes, lack of transportation etc. In such cases the customer has no right to compensation or refund.
7. Products cannot be returned without authorisation from Ponte Giulio S.p.A. The authorisation must be requested to Ponte Giulio S.p.A. in writing via email specifying the quality and quantity of products involved and reason for returning them. Ponte Giulio S.p.A. will authorise, at its discretion, the return by confirmation in writing.
8. Returns will be authorised only for products which are standard and currently in production with transportation at the expense of the customer. Ponte Giulio S.p.A. will refund 90% of the original sale price except any additional charges for restoration due to alteration or caused by negligence of the customer. Coloured or custom made products can not be returned.
9. These sales conditions are deemed accepted by the customer when the order is placed.
10. Orders which are fulfilled and invoiced, even partially, will be subject to the conditions decided upon. Payments for shipped goods will not depend on the order fulfilment.
11. It's Ponte Giulio's discretion to provide, in the form of discount, panels, displays or similar tools aimed at exhibiting the products.
12. Usually Ponte Giulio do not accept orders for products different from those in the catalogue. However Ponte Giulio reserves the right to assess the feasibility and size of special orders at prices that will be calculated at each time.
13. The acceptance of orders is subject to the approval from Ponte Giulio S.p.A. The agreed payment terms are always shown in the invoice. In case of non-fulfillment of the payment conditions, Ponte Giulio S.p.A. will be entitled to add charges for interest on arrears payments, with reference to terms released by Euribor. Failure to meet an invoice due date, Ponte Giulio S.p.A. is authorised to stop the fulfilment of all pending orders.
14. Ponte Giulio S.p.A. keeps the property of goods until the total payment of the relevant invoice.
15. For any dispute the court of Terni, Italy is the only one in charge. The content of this clause has been object of individual agreement between the parties.
16. Ponte Giulio S.p.A. retains ownership of the goods until the relative invoice has been fully paid.
17. For any controversy, the Courthouse of Terni is the only one that has jurisdiction as indicated by the parties. The content of this clause has been the subject of individual negotiation between the parties.

INFORMATION ON PERSONAL DATA

INFORMATION ON THE PROTECTION OF PERSONAL DATA

(pursuant to article 13, Italian Legislative Decree 196 of 30.06.2003)

"Personal Data Protection Code".

The company Ponte Giulio S.p.A., holder of the data relating to existing and future business relationships with its customers, in compliance with the provisions of art.13 of the Italian Legislative Decree 30.06.2003 no. 196 "Personal Data Protection Code", gives the following information on the processing of its customers' personal data:

The data is collected for contractual, commercial, statistical and promotional purposes.

The data is processed using digital, telematic, magnetic and paper supports.

Data collection is mandatory in order to comply with all accounting, legal and commercial obligations. Failure to provide data that is not attributable to legal or contractual obligations will be assessed each time by the Data Controller who will determine the resulting decisions regarding the importance of such data with respect to the management of the business relation.

The recipients of the data, without prejudice to the communications and disclosures made in compliance with legal obligations, may be the following subjects: company personnel according to their areas of competence (sales, production, administration,) agents and representatives of the writer, factoring company, debt collection companies, credit insurance companies, credit institutions, leasing companies, professionals and consultants, data processing companies, commercial information companies, companies operating in the transport sector.

The data will be processed for the entire duration of the contractual relationships established and also subsequently for the fulfilment of all legal obligations as well as for future commercial and marketing purposes, in relation to promotional and product sales operations, carried out by sending advertisements or the using other commercial communication systems.

The interested party may exercise the rights referred to in art. 7 of the Italian Legislative Decree 30.06.2003 no. 196.

The Data Controller is Ponte Giulio S.p.A., Loc. Ponte Giulio snc, 05018 Orvieto (TR).

To contact the Data Processor, appointed for the purposes of art. 7 of the Italian Legislative Decree 30.06.2003 no. 196, you can contact the following address: Orvieto, Loc. Ponte Giulio snc - Tel. 0763316044 - email: privacy@pontegiulio.it.

SYMBOLS FOR CHARACTERISTICS

The "CE" marking indicates that the products meet the European community directives. Ponte Giulio products, due to their type, refer to the respective unified directive.

Ponte Giulio products are subjected to quality and durability tests both in their own laboratories and in the laboratories of third parties, amongst which "TÜV SÜD Italia s.r.l.", "Setec", "Istituto Giordano" and "pH s.r.l. - TÜV SÜD group".

Depending on the type of product, among others, checks are carried out aimed at verifying static resistance, stress, durability in a climatic cell and biocompatibility.

Ponte Giulio is sensitive and attentive to the impact of its activities on the environment.

This symbol indicates that the products with which it is associated may have been made with recycled raw materials, that is, they may be recyclable or finally guarantee re-usability at the end of their service life.

This symbol is associated with all products equipped with screws and dowels for fixing. It is useful to remember that the fastening elements supplied, with the various items, are suitable only for walls made of concrete, solid or hollow bricks and light natural stone.

Ponte Giulio uses "Biocote[®]" technology on its products to offer greater hygiene. Biocote[®] protects, for the entire duration of the product, the surfaces on which it is applied, preventing the proliferation and survival of microbes, bacteria, mould and fungi.

Some items are offered with their components "divided", so they need to be assembled by the user or installer; this symbol identifies this feature.

This symbol identifies products with "assembled" components, therefore ready to be installed when they are removed from the packaging.

Products identified with this symbol are "reversible"; this means that the installation can be carried out indistinctly on the "right side" or on the "left side".

This symbol identifies items that have moving parts. The movement function can be performed either by means of a direct action on the product or indirectly, by means of automatic mechanisms, which can be pneumatic, electro-actuated or hydraulic.

An uncontrolled accumulation of body fat determines a condition of excess weight. This icon identifies all items made to be used by people in this physical condition.

This symbol indicates that the product has been designed and manufactured taking into account the maximum possible water savings, while maintaining performance in daily use.

The acronym "BIM" Building Information Modeling indicates a method for optimising the planning, construction and management of buildings with the help of software. The items, with which this icon is associated, are also available in this version.

This symbol identifies items that limit the risk of sliding barefoot.

This symbol is associated with products for which it is possible to customise the size or shape according to the customer's needs.

CONFIGURATION FOR STANDARD BATHROOM

CONFIGURATION FOR STANDARD BATHROOM WITHOUT SHOWER

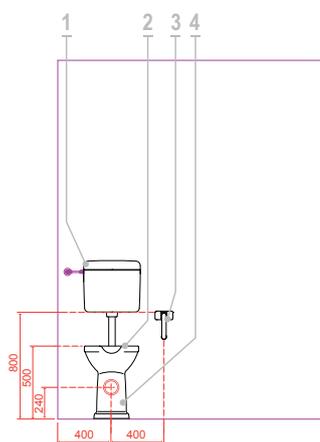

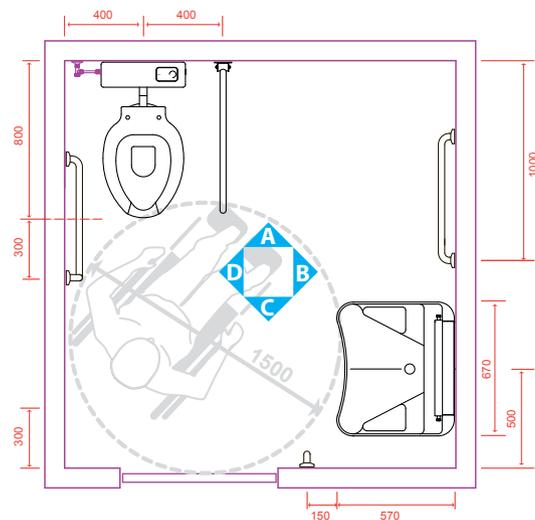

“Standard” layout of a bathroom for disabled people, equipped with a toilet and a washbasin.

Positions and measurements required by law and recommended

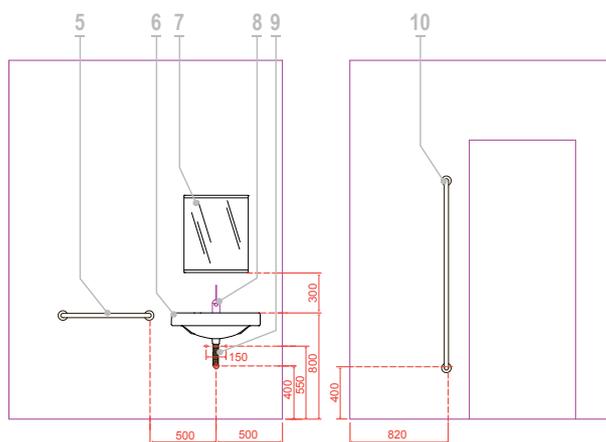

The drawings on this page show the configuration for a bathroom intended for use in public environments, in compliance with the Italian Presidential Decree 503, article 8.1.6 of 24 July 1996.

The offer is based on a collection of vinyl coated steel aids.

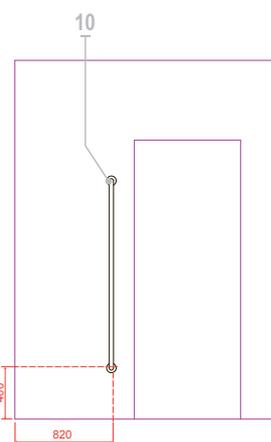

For details relating to each product, go to the page indicated next to each item in the list below.

Fixing cylinders and flanges

Product types in which these systems are used

- *Grab bars*
- *Safety supports for corners*
- *Corner safety supports*
- *Fixed lateral supports*
- *Handrail*

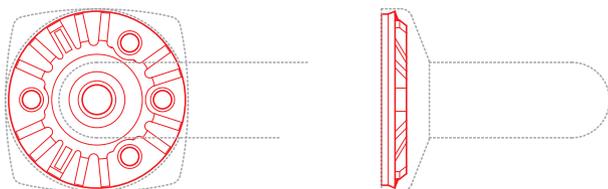

Fixing flanges

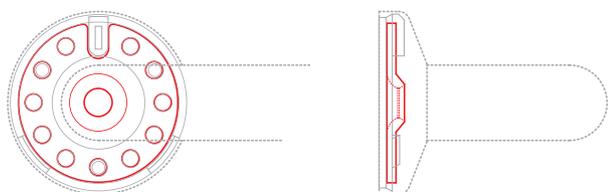

Flange 3 holes - Stainless steel with satin finish
Stainless steel - AISI 304, ø 77 mm

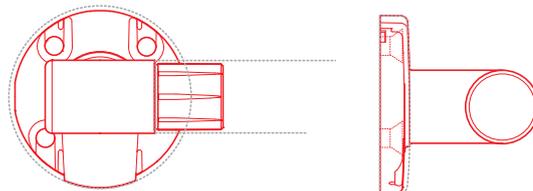

Flange 6 holes - Urban People
Stainless steel - AISI 304 ø 66 mm

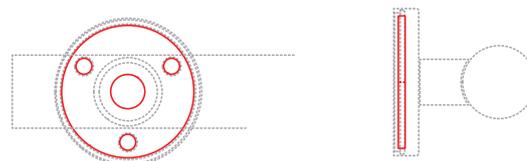

Flange 4 holes - Paint
Polyamide-6, fibreglass reinforced, ø 77 mm

Flange 11 holes - Tubocolor, Polished stainless steel, (Urban People)
Stainless steel - AISI 304, ø 70 mm

Flange 3 holes - Prestigio
ABS, ø 76 mm

Flange 3 holes - Solo
Stainless steel - AISI 304, ø 58 mm

Fixing cylinders

Single hole cylinder - Prestigio+
Aluminium ø 21 mm

Single hole cylinder - Family
Aluminium ø 22 mm

Please bear in mind that the particular configuration of the fixing systems, based on a cylinder that uses only one wall anchor point, requires great care during installation. The references in the table with the anchors recommended according to the type of wall, cannot be considered exhaustive. It is advisable to contact Ponte Giulio in case of doubts or to obtain specific installation instructions.

Anchors recommended according to the type of wall

Remember that the aids must be installed by qualified expert personnel, who are responsible for choosing the most suitable fastening elements according to the wall on which the aid must be installed.

Among other things, the installer must make sure that the wall, corresponding with the entire flange, is perfectly flat, without joints or protruding tiles. It is also necessary to make sure that the wall is suitable for the installation of the aid and that there are no weak points.

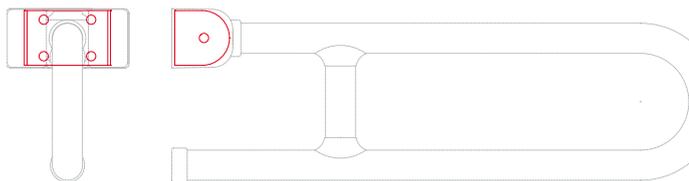

Type of wall	Recommended dowel
Concrete	 <p>Dowels type "SX8" Fischer Screws for chipboard TSP 6x70 stainless steel Drill hole with \varnothing 8 mm bit.</p>
"Gasbeton" blocks Light natural stone	 <p>Dowels type "SX8" Fischer Screws for chipboard TSP 6x70 stainless steel Drill hole with \varnothing 8 mm bit.</p>
Hollow bricks	 <p>Dowels type "SX8" Fischer Screws for chipboard TSP 6x70 stainless steel Drill hole with \varnothing 8 mm bit. Drill hole with rotation only, avoiding percussion</p>
Solid bricks Compact natural stone	 <p>Dowels type "SX8" Fischer Screws for chipboard TSP 6x70 stainless steel Drill hole with \varnothing 8 mm bit.</p>
Plasterboard Plywood or laminates Coupled in wooden or multilayer fixing plate - 20 mm thick, installed between the uprights or against the wall	 <p>Screws for chipboard TSP 6x70 stainless steel Drill hole with \varnothing 8 mm bit.</p>
Plasterboard Plywood or laminates Coupled in steel fixing plate, installed between the uprights or against the wall	 <p>Screws TSP M8x60 stainless steel DIN 965 A2 Drill hole with \varnothing 8 mm bit. The actual loadability of the system depends on the thickness of the sheet</p>

INSTRUCTIONS FOR THE INSTALLATION OF WALL-MOUNTED AIDS

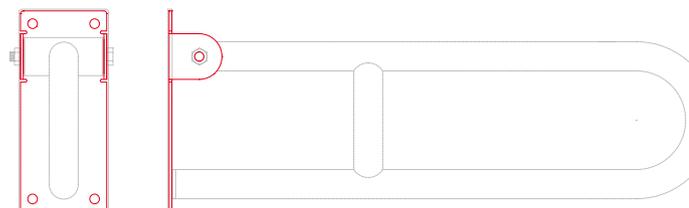

Fixing plates

INDEX BY PRODUCT CODE

The list of items, shown in this price list, is ordered by product code below, in alphanumeric order. Each line features a code associated with the sales price per single item and, where provided, per "3" pieces, all expressed in Euros. Finally, the number of the page where the item is described is indicated.

Code	Price x 1	x 3	P.
